

Bismuth Selenide Sputtering Target

Product family: Sputtering Targets

SUPPLY FORMS	INFORMATION FOR A PRECISE RFQ
- Planar sputtering target - Bonded target - Source pieces where suitable - Custom research sizes	- Minimum purity - Stoichiometry tolerance - Target dimensions - Density - Bonding and backing - Quantity

TYPICAL APPLICATIONS

- Topological insulators
- Thermoelectric films
- Quantum materials

ORDER AND DOCUMENTATION

Final purity, composition, dimensions, tolerances, analysis documentation, quantity, lead time and DAP or EXW delivery terms are confirmed in the Adesis quotation. Values in this guide are descriptive and do not constitute a binding product specification.
