

CIGS Sputtering Target

Cu(In,Ga)Se₂

Product family: Sputtering Targets

SUPPLY FORMS	INFORMATION FOR A PRECISE RFQ
• Single compound target • Custom Cu/In/Ga/Se ratio • Bonded planar target • Research-scale geometry	• Exact elemental ratio • Atomic or weight basis • Purity • Dimensions and density • Backing plate • Quantity

TYPICAL APPLICATIONS

- Thin-film photovoltaics
- Absorber-layer research
- Solar-cell process development

ORDER AND DOCUMENTATION

Final purity, composition, dimensions, tolerances, analysis documentation, quantity, lead time and DAP or EXW delivery terms are confirmed in the Adesis quotation. Values in this guide are descriptive and do not constitute a binding product specification.
